To: Our Patients, Visitors and Community Members

We are reaching out to you to provide information regarding the Coronavirus/COVID-19 so that we can work together and be proactive in securing the health of our communities.

If you are coming to the hospital, we ask all patients and visitors to enter the facility from the east clinic entrance so that we can better serve you. Our staff will ask you a series of questions when you enter and your answers will help us in providing you the best care:

- Do you have a fever, cough?
- Do you have shortness of breath and/or trouble breathing?
- Have you traveled outside the country and/or from a location that has reported positive coronavirus cases?

Depending on your symptoms you may be asked to apply a face mask or hand sanitizer that we will have readily available for you. If you or your loved one starts to experience symptoms of fever, cough, shortness of breath or difficulty breathing you can call one of our direct line: West Clinic 701-477-8444 or East Clinic 701-477-8445. We have staff available to answer your questions and advise if you need to seek medical care.

We know this is a difficult time for everyone and to help our patients during this time we are offering over the counter medications such as Tylenol, Motrin, Liquid Tylenol, Liquid Motrin and/or cough syrup at the pharmacy to help treat your symptoms.

We have enclosed informational information from the CDC for your information. We will continue to provide you updated information. If you have any questions or concern(s) we are here for you.

Sincerely,

Shelly Harris, CEO
